

FOR SMALL CLINICS & INDIVIDUAL DOCTORS

Small clinic. Big digital care.

Appointments, live queue, teleconsultation, an AI-assisted doctor workflow, digital prescriptions and patient documents — one connected system, from booking to prescription.

Connected care. Better health.

Retire the spreadsheet, the
WhatsApp threads and the paper
slips —
run one flow instead.

Everything the front office, the
doctor and the patient need lives
in the same place.

Booking & live queue

Slot-based appointments with token, queue position and arrival status.

Video + in-clinic visits

One flow for teleconsults and walk-ins — patients pick what suits them.

Digital Rx & reports

Prescriptions, advice and lab documents shared straight to the patient app.

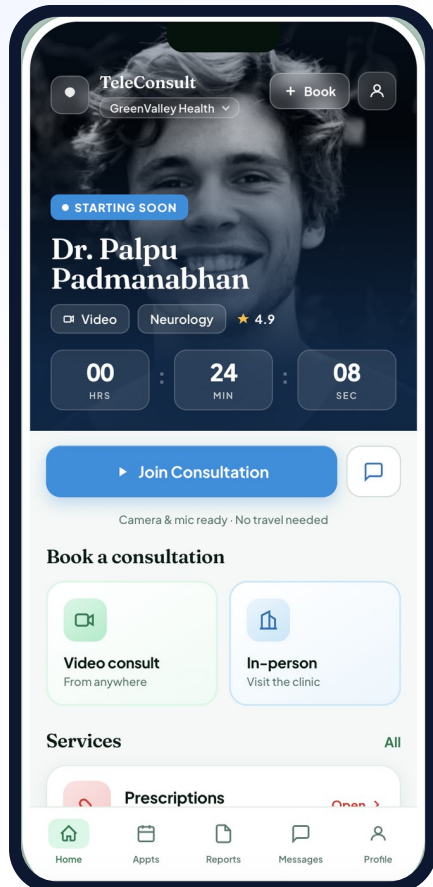

Built around the real clinic day

From front-desk booking to consultation and follow-up documents, the workflow is simple enough for a two-person clinic and polished enough to impress every patient who walks in.

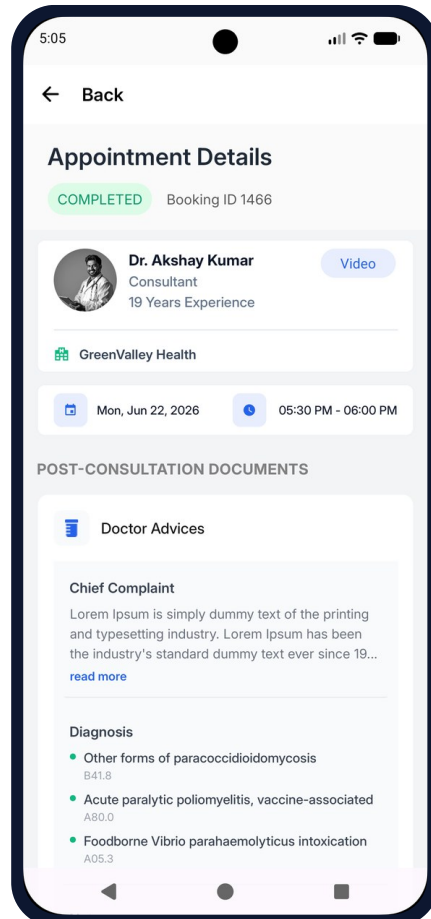

What the patient sees

A branded, premium experience – no confusion about where to be or what comes next.

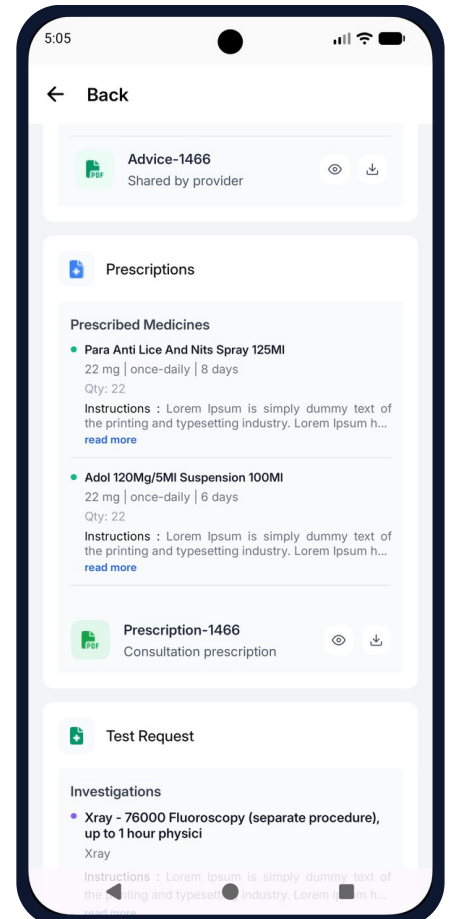

Teleconsult, ready to join

Countdown, one-tap join and “camera & mic ready” – care from anywhere.

Consultation on record

Chief complaint, diagnosis and doctor advice, kept for every visit.

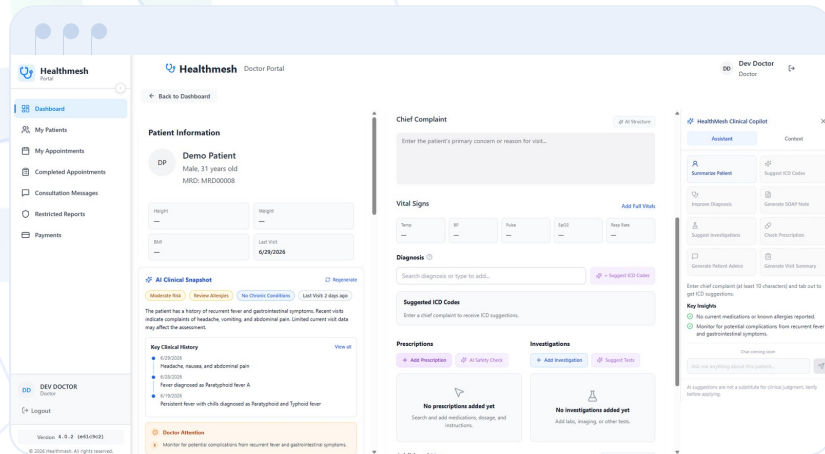

Rx, advice & tests

Prescribed medicines, investigations and PDFs to view or download.

An AI copilot in every consultation

The HealthMesh Clinical Copilot works alongside the doctor through the visit – summarising the patient, suggesting codes and drafting notes – so more of the appointment goes to care and less to paperwork.

Patient snapshot, risk flags and vitals in view – the copilot panel one click to the right.

Summarize patient
Instant overview pulled from past visits and history.

Suggest ICD codes
Diagnosis coding drawn from the chief complaint.

Generate SOAP note
A structured clinical note in a single click.

AI safety check
Flags prescription risks before the doctor signs off.

Suggest tests
Relevant labs and investigations to consider.

Advice & visit summary
Patient advice and summaries, auto-drafted to share.

AI Clinical Snapshot

Risk level, allergy review, chronic conditions and key history surface the moment a patient opens. **Every suggestion is verify-before-apply – the doctor always decides.**

A clinic that looks organized from day one

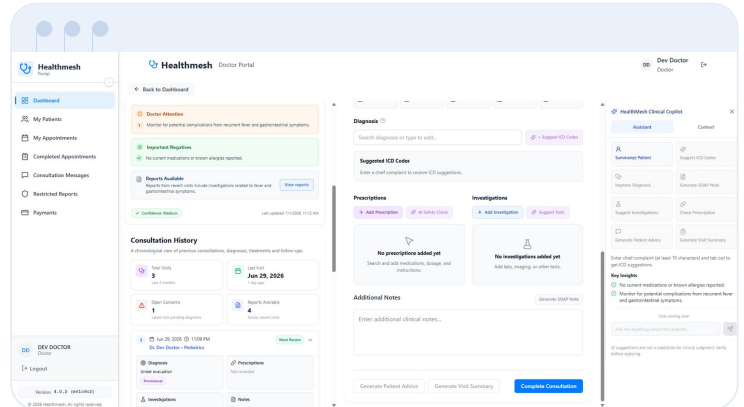

✓ Doctor schedule control
Weekly & bi-weekly availability, blocked slots and conflicts caught before they reach patients.

✓ AI-assisted consultations
Summaries, ICD codes, SOAP notes and safety checks, right in the workflow.

✓ A digital trail
Consultation history stays accessible instead of scattered across chats and paper.

✓ Less waiting-room confusion
Token and live status tell patients exactly where they stand.

✓ Ready to grow
Start with the essentials today, switch on more modules as the clinic scales.

Diagnosis, prescriptions and investigations in one place – then Complete Consultation, and documents reach the patient app.
